Market Place,
Wiltshire, SP1 1JH

Dear Annie,

EE Ltd and Hutchison 3G UK Ltd

Industry Best Practice Informal Engagement

Proposed upgrade works at Telecommunications Site 303650 Campbell Road Salisbury Wiltshire SP1 3BQ

We write in connection with a proposal by EE Ltd and Hutchison 3G UK Ltd, in conjunction with Mobile Broadband Network Limited (MBNL), to carry out upgrade works at the above site, which is managed by Cellnex.

As you will be aware, all the Mobile Network Operators have agreed to carry out informal engagement with local communities as a matter of industry Best Practice. This has been developed with the support of Government along with other interested stakeholders, including the Local Government Association and Planning Officer's Society. Your co-operation within this informal process is therefore encouraged to help facilitate the balanced deployment of mobile communications infrastructure that will deliver benefits to your local area.

The proposed development comprises:

- ***Installation of 3 no. antennas***
- ***Associated apparatus and ancillary works***

The enclosed drawings provide further details of the siting and the design of the development.

The location of the proposed development is shown below:

Fig. 1: Annotated Google Maps extract showing the location of the proposal

We consider that the proposed apparatus looks to satisfactorily balance the various operational considerations and minimise the extent of visual influence associated with the development.

The proposed development is designed to operate in accordance with all health and safety requirements, including the guidelines issued by the International Commission on Non-ionizing Radiation Protection (ICNIRP).

We look forward to receiving any comments you may have. It would be greatly appreciated if you could forward any comments to me within the next 14 days.

Yours sincerely,

Steven Peck
