

Highways Improvement Request Form

Location of Issue:	Access to houses off of Hawksridge Rd (see attached photos)
Community Area:	Salisbury
Parish or Town Council:	Salisbury City Council
Nature of Issue:	
<p>Concerns about pedestrian safety due to visibility challenges. When drivers enter the access to the back of houses, there have been several near misses where pedestrians attempting to walk out onto the pavement (from the vehicle access which does not have a pavement), have had to quickly dodge out of the way to not be hit by the vehicles driving in, sometimes at a perceived high speed, due to the lack of space, visibility and resident's disabilities/vulnerabilities.</p>	
How long has it been an issue?	Many years, but at least 2 occasions that have felt dangerous to Mr Wicks and his mum
What would you like done to resolve this issue?	
<p>Ideally, a pavement needs to be added to the vehicle access way, perhaps using part of the land/verge by the Church.</p> <p>If not a pavement, then at least some lighting to help at night, a bollard to force drivers to slow down as they enter and to have to look into the accessway before driving up it, a speed bump or some signage indicating that pedestrians could be in the accessway.</p> <p>Also, a quick-ish win could be to remove all/some of the hedge on the left (opposite side of the church), which could help with visibility for pedestrians and drivers</p>	
Have you been in touch with your local Wiltshire Councillor? (Yes/No)	No
