

## Highways Improvement Request Form

**Location:** 27 Wilton Rd, Salisbury, SP2 7ED

**Nature of Issue:** The proximity of the mosque to a busy main road poses a significant risk to children aged five to thirteen attending classes there. Firstly, young children may not always be fully aware of traffic dangers and may attempt to cross the road without caution. Additionally, the heavy traffic flow increases the likelihood of accidents, especially during peak hours when classes typically start and end.

**Nature of Issue:** Our proposal involves installing a metal barrier outside the mosque and implementing a zebra crossing on the road to ensure safe passage for the children. By combining these measures, we aim to create a safer environment for children to access the Mosque, reducing the risk of accidents and ensuring their well-being.
