Funeral Director					
Name		Address			
All forms to be delivered No later than 9:30am, 2 working days prior to the Cremation to: Salisbury Crematorium, Barrington Road, Salisbury, Wiltshire, SP1 3JB PTO.					

Important Guidance Notes for Salisbury Crematorium

What's included in the Cremation Fee:

- The use of the Chapel, Organ (not including organist), Wesley Music System- operated by the crematorium staff, Waiting Room and all attendances after the coffin is placed on the catafalque.
- Ash Box for the removal of the Cremated Remains and Cremation Certificate.
- Disposal of Cremated Remains by scattering in the Garden of Remembrance if desired.

Responsibilities:

The funeral director is responsible for the provision of sufficient bearers to convey the coffin reverently from the hearse to the placing of it on the catafalque whereupon it shall become the responsibility of Salisbury City Council (SCC). The funeral director is also responsible for declaring the weight of the coffin and deceased (combined) if over 22 stone.

Construction of the Cremation Coffin:

The coffin must be made of wood or a wood by-product (including cardboard and approved wicker constructions) which, when placed into a cremator and subjected to the accepted cremation processes, is easily combustible and does not emit smoke, give off toxic gas or leave any retardant smears or drips after final combustion. No metal furniture or fittings whatsoever should be used on a coffin. No metal of any kind can be used in the manufacture of such a coffin except as necessary for its safe construction, and then only metal of a high ferrous content should be used. Crosspieces must **not** be attached to the base of the coffin, if it is desired to strengthen the coffin, a flat wooden base may be secured on the outside of the coffin, as this **must** remain completely flat for the safe charging into the cremator, thus enabling the Salisbury City Council to adhere to all Health and Safety procedures. The coffin must not be painted or varnished unless it is with a water-based product suitable for cremation. Any special requirements must be presented to the Crematorium & Cemeteries Manager prior to any arrangements being made with the Applicant for the intended cremation.

Lining of the Cremation Coffin:

The use of sawdust or cotton wool must be avoided at all times. All cremation coffins must be sealed with polypropylene plastic sheeting such as *Crem Film* and stapled to the top of the coffin rim only to avoid leakages. No metal, rubber or polyvinyl chloride (PVC) will be permitted and under no account must pitch or any similar substance be used.

Clothing / Additions to the Cremation Coffin:

Only natural materials such as cotton, linen and wool should be used in the composition of any personal clothing used for cremation. **No** metal, glass, ceramic or flammable objects will be placed in the coffin.

Size of the Cremation Coffin:

The maximum size of a cremation coffin (including handles) accepted into the care of Salisbury Crematorium is not to exceed: **Length: 228 cm (90 inches); Width: 91cm (36 inches); Depth: 61 cm (24 inches).** ***SCC does not accept a coffin and deceased (combined) that is more than 30 stone.**

The **Coffin Declaration** on the front of this form **must** be signed by the funeral director and the exact weight given (including coffin) if its weight is over 22 stone (and not exceeding the maximum accepted of 30 stone).

Time of Cremation:

The Cremation will take place within 72 hours of the service in accordance with the Guiding Principles in the Charter for the Bereaved and the Code of Cremation Practice. *Consent is given, by signing this form, to retain the body of the deceased (if required) following the committal. This is to minimise the impact to the environment.*

We can send information about remembrance services and memorial options available at the Crematorium. If you require this service please tick the box ☐
