

Highways Improvement Request Form

Issue Details

Location of Issue:	Netherhampton Road - locked, vague.swan (what3words)
Community Area:	Salisbury
Parish or Town Council:	Salisbury City Council
Nature of Issue:	
The pedestrian crossing situated on Netherampton Road near the OneStop is becoming more dangerous by the day. The locals I know and have spoken to about the crossing are afraid to use it and prefer to cross elsewhere. This is a crossing used by parents, school and nursery children who end up having to wait for conscious driver to stop! Many speed and I have had moments where drivers stop halfway on the crossing With the extra housing and increased traffic for the hospital staff and residents in Wilton and St P' Place, this road is being used more frequently	
How long has it been an issue?	Ever increasing
What would you like done to resolve this issue?	
The crossing needs to be raised as a reminder that it is in fact a pedestrian crossing. Similar to other pedestrian crossing in Laverstock and the city centre. If moderisation is a must, upgrade to existing infrastructure is needed too.	
Have you been in touch with your local Wiltshire Councillor?	Yes
