

Notice of Motion - Number 65

Councillor initiating: Cllr C Taylor

Committee: Full Council

Date of meeting: 9 March 2026

Subject: Traffic Lights at Castle Road Roundabout

Background [Motion]:

Castle Road Roundabout, on the A36 Trunk Road, was equipped with analogue traffic lights. These have been turned off for over a month to allow the lights to be upgraded from analogue to digital. The anecdotal evidence is, that with the lights off, the traffic has flowed more freely; congestion and queues have been markedly reduced with an associated reduction in noise pollution and improvement in air quality.

Resolution:

This Council formally requests National Highways to investigate further whether Salisbury's trunk road roundabouts, including the Harnham Gyratory, could be operated more efficiently without traffic lights for part or all of the day.
